Introduction

Welcome to Dashboard! Taking care of your car can be a hassle. Make car maintenance easier with Dashboard. Get reminders about upcoming service appointments and tasks, browse simple step by step tutorials, learn useful tips, and discover local service station information at your fingertips. Download Dashboard today to manage your car's needs.

Actions

1. Tap
2. Swipe
3. Scroll

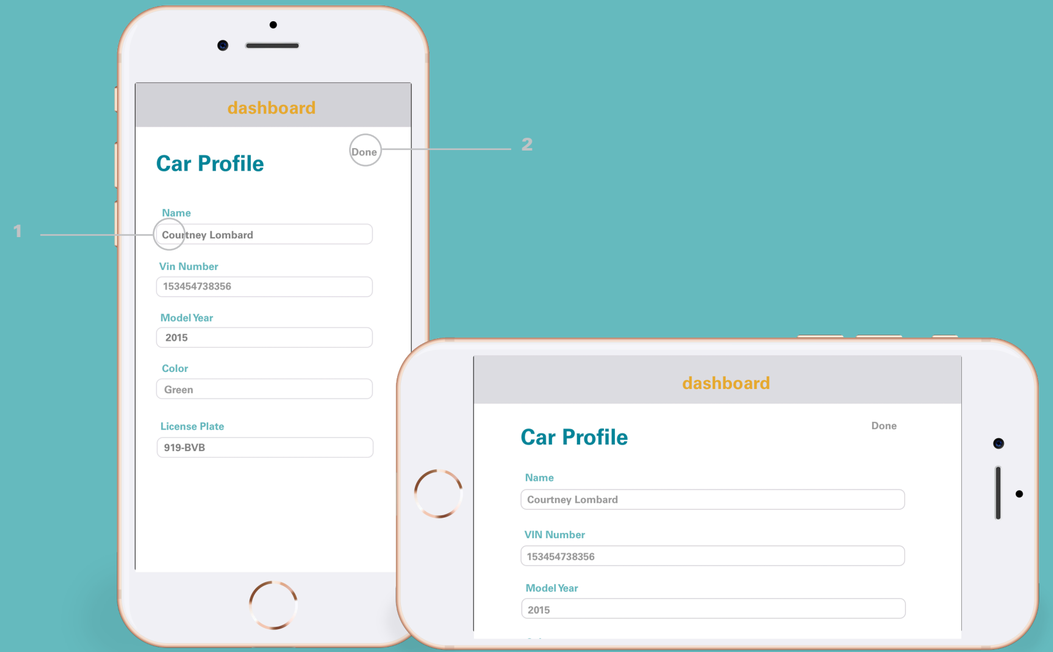

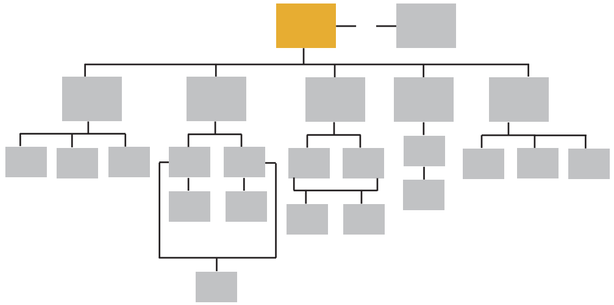

Car Profile

In the Car Profile screen, the user can put in their vehicle and personal information so that they can use the app. They can tap to type in the information and press “Done” when they are finished which will bring them back to the home screen.

Actions

1. Tap to type
2. Tap to go to home screen

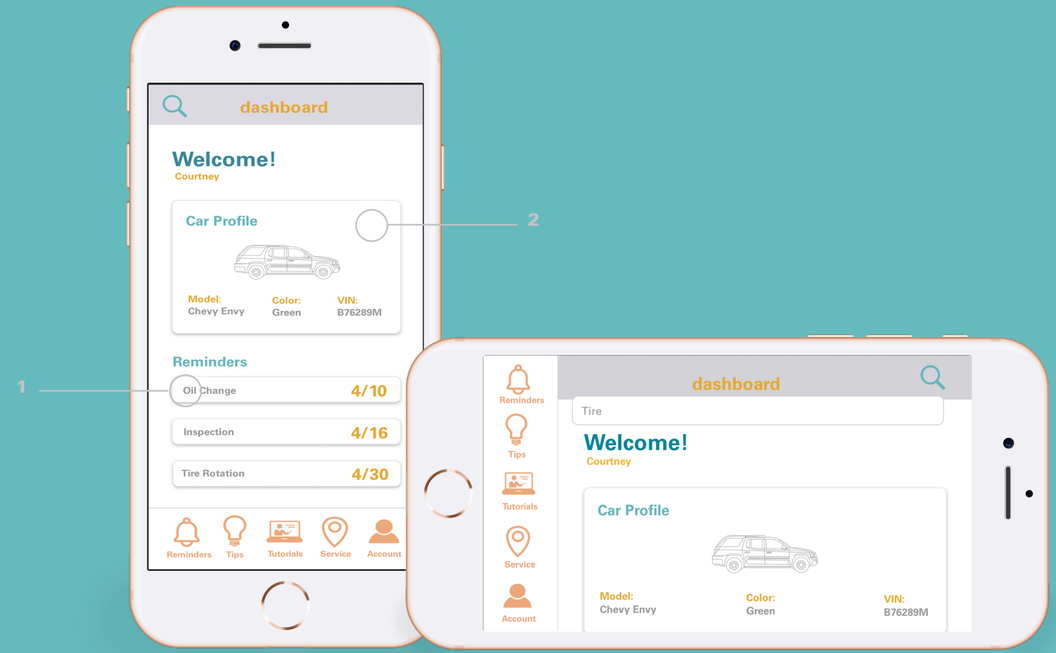

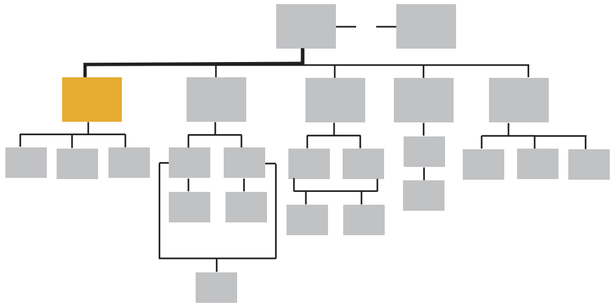

Home Screen

Dashboard's home screen integrates the app's most used features. Upon opening the app, the user's Car Profile is visible so that the user is aware which vehicle the app is currently referring too. In addition, a feed of their recent reminders is also visible. Upon clicking each of these features, the user will be brought to the Car Profile or an individual reminder screen.

Actions

1. Tap to view a reminder
2. Tap to view Car Profile

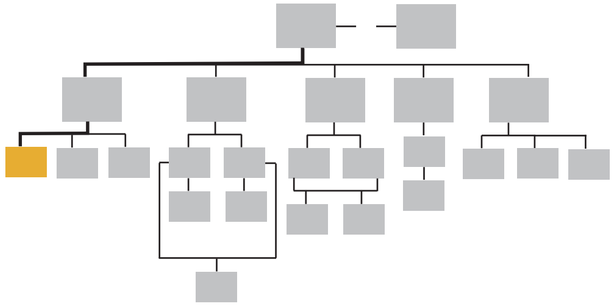

Reminders

Dashboard's Reminders screen features all of the reminders the user has entered into the app. The buttons display the reminder's title and date so that the user knows the important details of the reminder without opening the Details screen. Upon clicking each box, the user is brought to a detail screen that gives more information about that particular reminder. Furthermore, if the user presses the "Add Reminder" button, then they will be brought to the New Reminder screen.

Actions

1. Tap to view reminder
2. Tap to add reminder

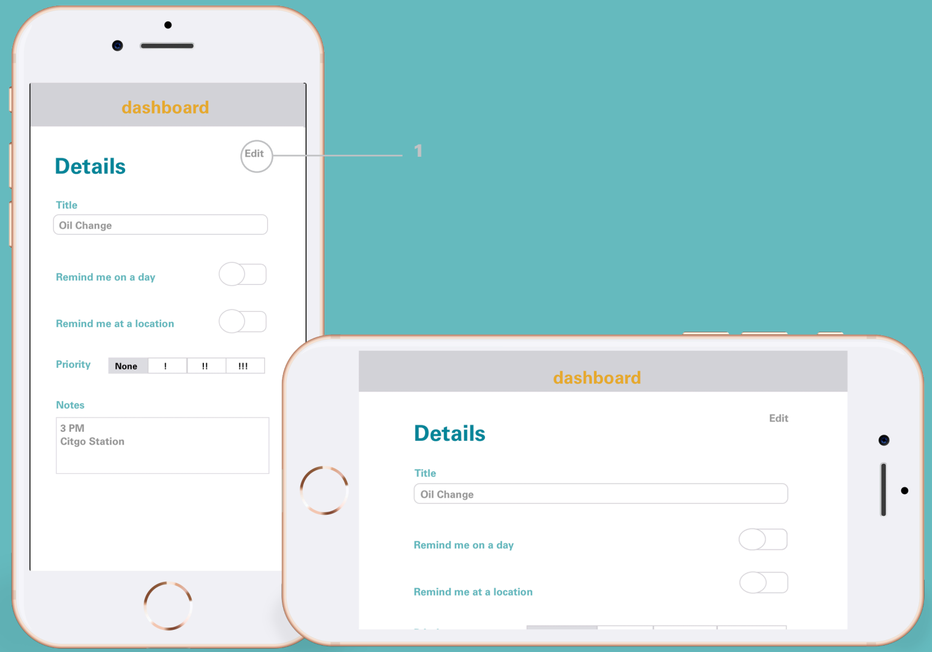

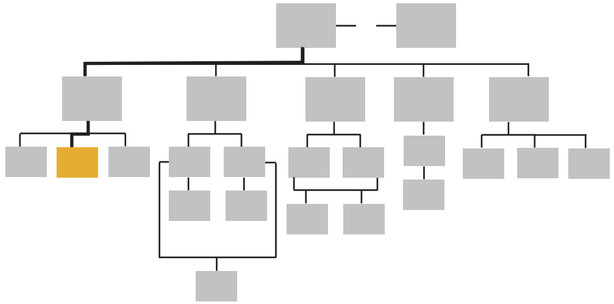

Details

The Details screen provides important information about a particular reminder, such as its location and the address of the upcoming appointment. User's can click on the edit button where they will be brought to the Edit screen to change the reminder.

Actions

1. Tap to edit

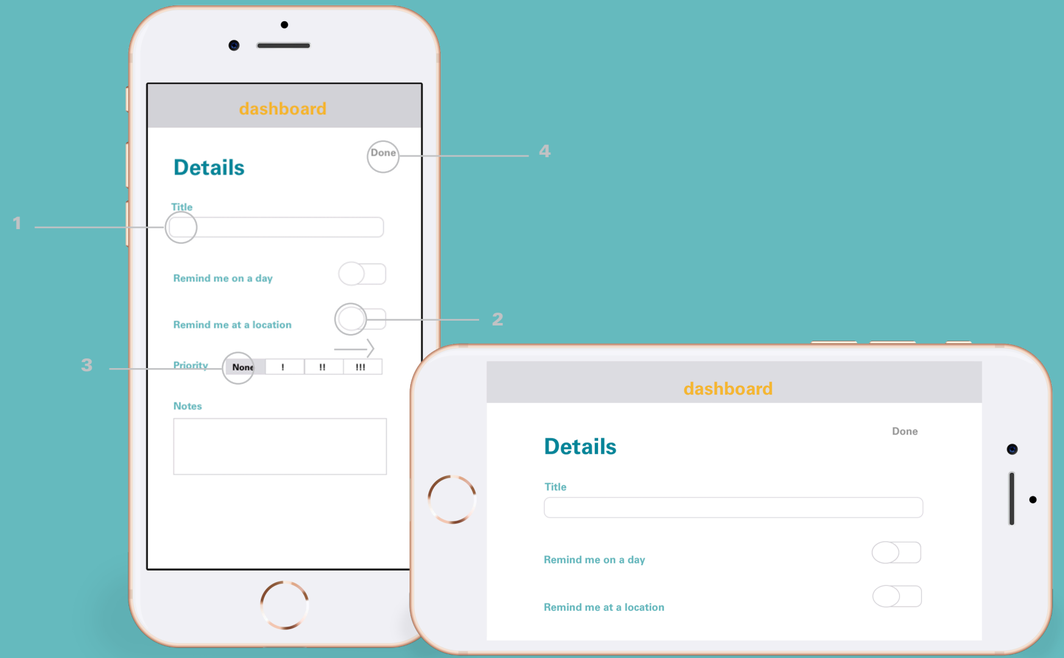

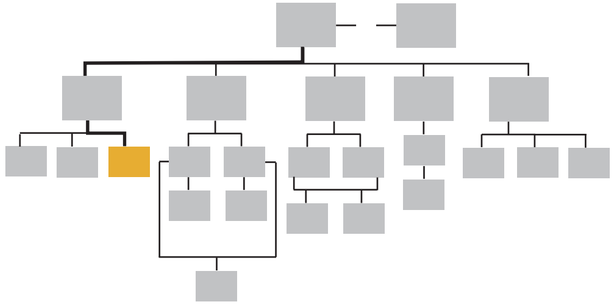

New Reminder

The New Reminder screen allows a user to add a reminder to their existing list. On the New Reminder screen, the user is able to type in the name of the reminder, set an alert for a specific time of day or location, specify its priority, and add additional notes. The user will be brought back to the Reminders screen when tapping “Done.”

Actions

1. Tap to type
2. Swipe to remind on a day
3. Tap to choose priority
4. Tap to save reminder

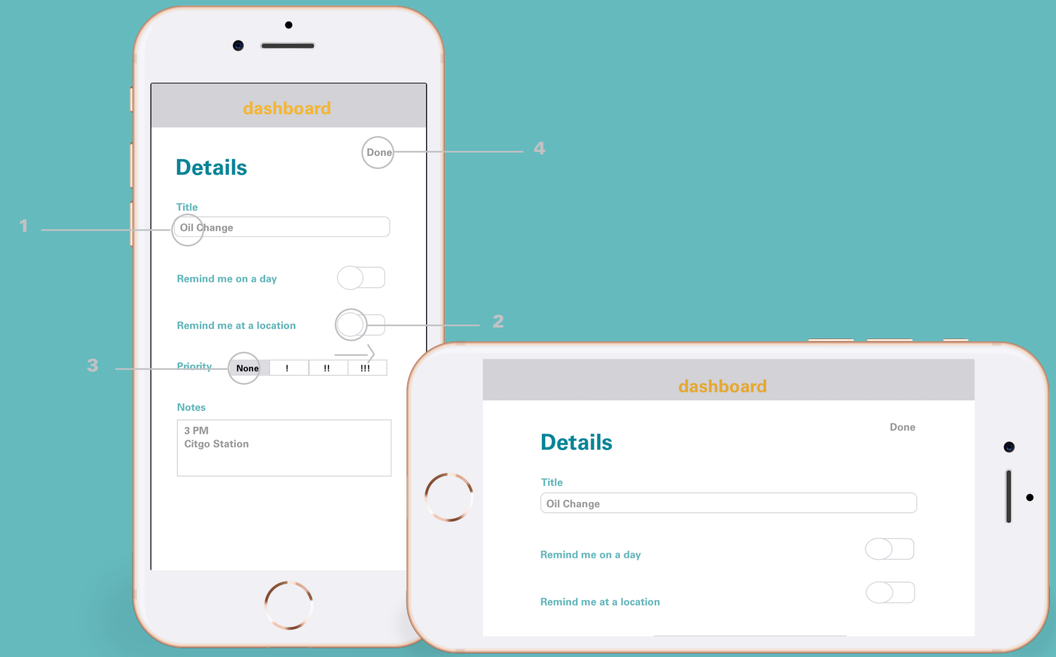

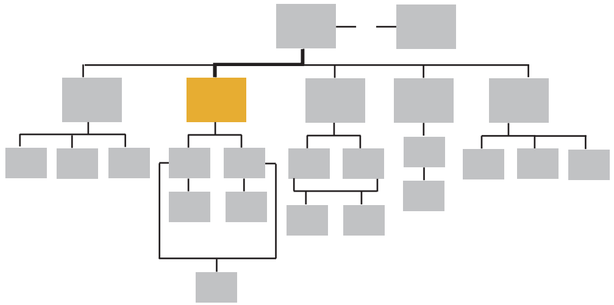

Edit

The Edit screen allows a user to edit to an existing reminder. In the Edit screen, the user can change the title, address, priority, and reminders of the notification. When the user taps “Done” the changes will be saved and they will be brought back to the Reminders screen.

Actions

1. Tap to type
2. Swipe to remind on a day
3. Tap to choose priority
4. Tap to save reminder

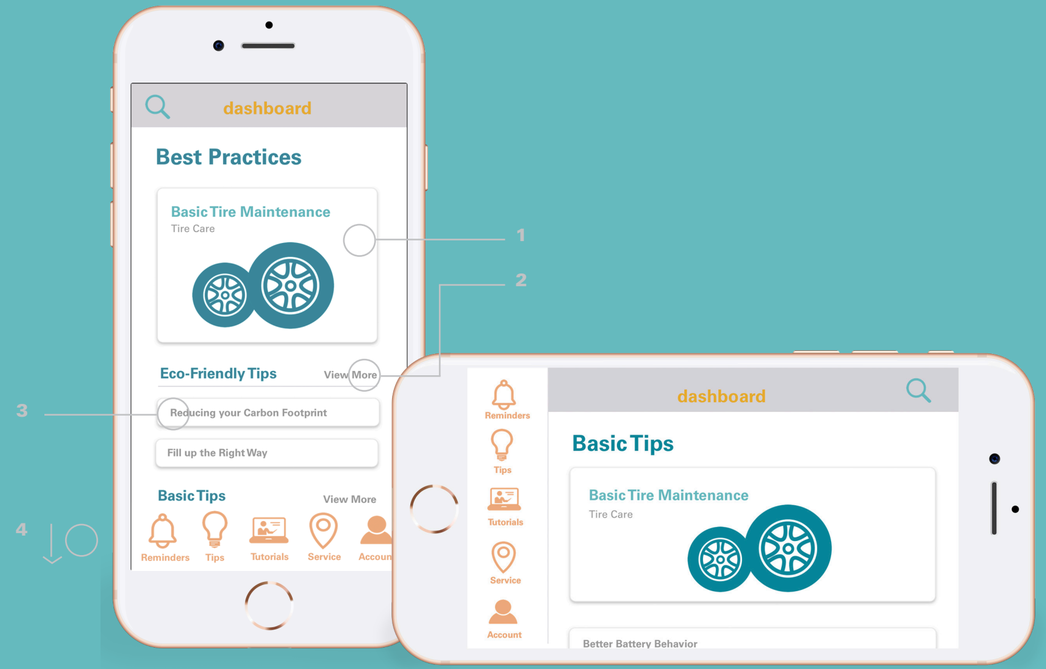

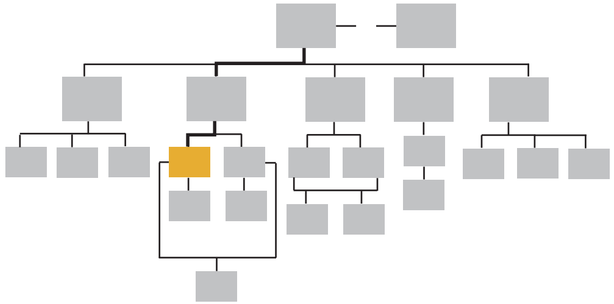

Best Practices

The Best Practices screen displays a real time feed of all the recent eco-friendly and basic tips on the app. The user can click on each individual tip button to be brought to a specific tip article or click on the “View More” link to be brought to the Eco-Friendly Tips screen or the Basic Tips screen which list all of the eco-friendly or basic tips on the app.

Actions

1. Tap to view featured tip
2. Tap to see more eco-friendly tips on the Eco-Friendly Tips screen.
3. Tap to go to a specific tip screen
4. Scroll down to see other tips

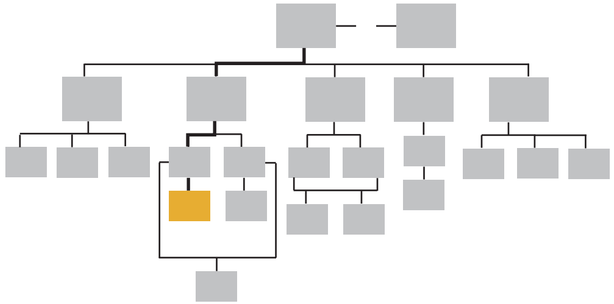

Eco-Friendly Tips

The Eco-Friendly Tips screen provides a listing of all of the eco-friendly tips on the app. The user can press each tip to bring them to an individual screen that would detail the information of that specific tip.

Actions

1. Tap to view featured tip
2. Tap to go to individual tip page
3. Scroll to view more eco-friendly tips

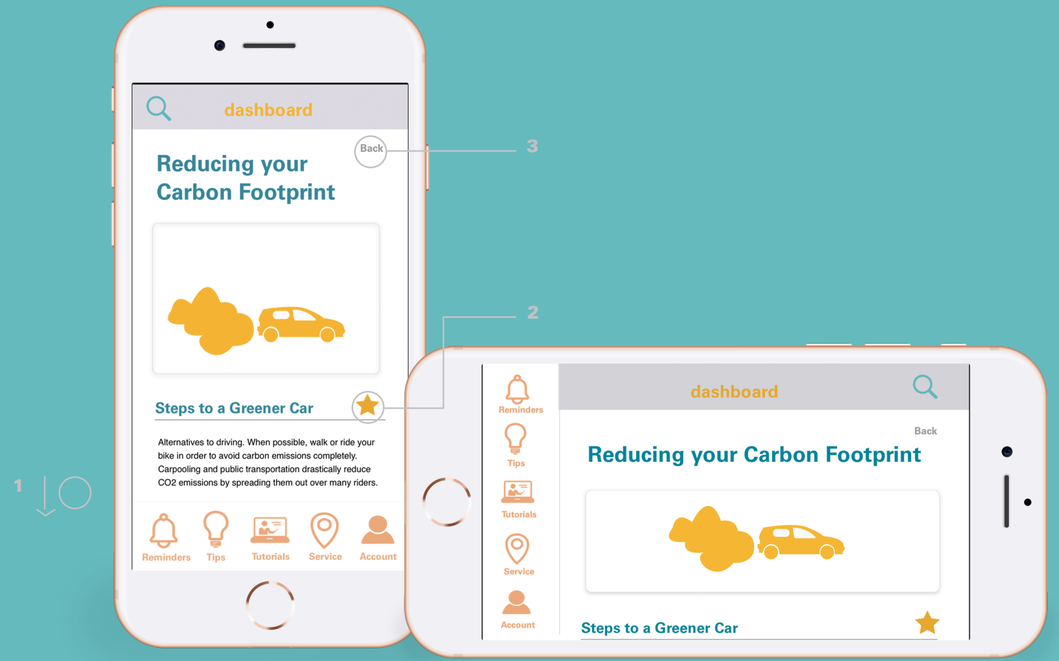

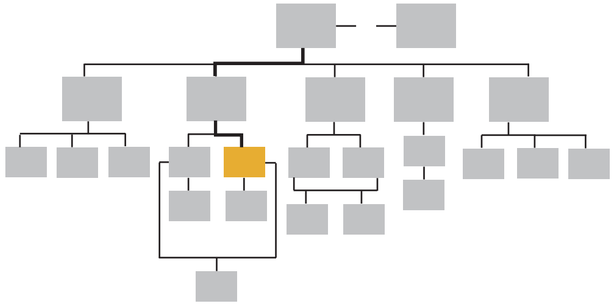

Eco-Friendly Tip

The Eco-Friendly Tip screen gives the important details of an eco-friendly or basic tip. The tip shown discusses the ways in which a driver can reduce their carbon footprint. In addition, the user can post comments or read questions within each tip article by scrolling to the bottom. The user can also tap the star to favorite a tip. When they click the "Back" button they will be brought back to the Eco-Friendly Tips screen.

Actions

1. Scroll to read more of article
2. Tap to favorite a tip
3. Tap to go back to Eco-Friendly Tips screen

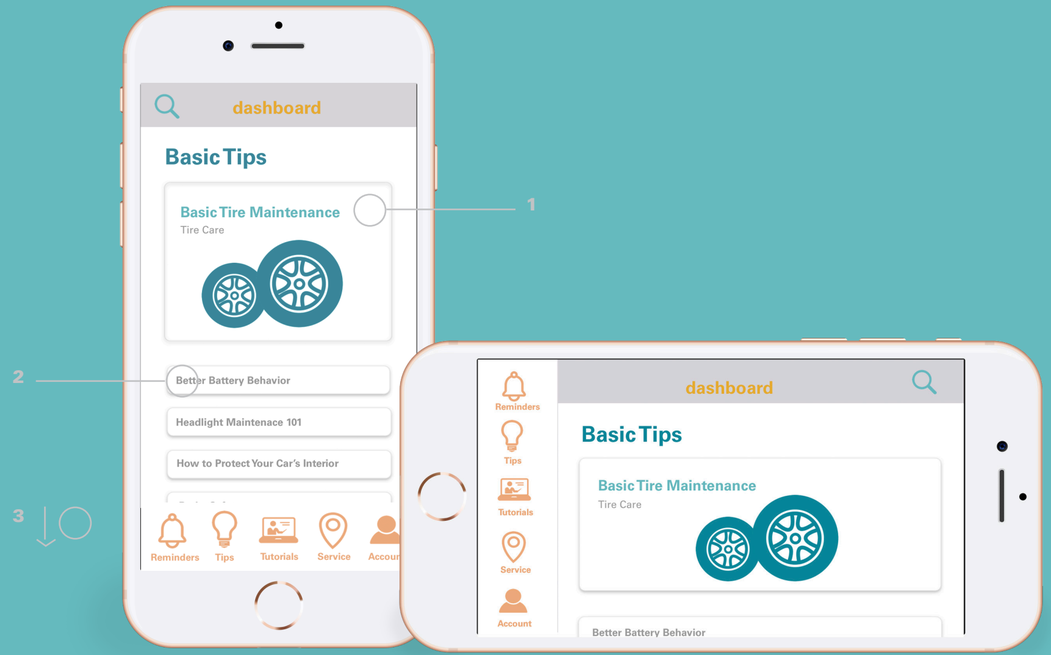

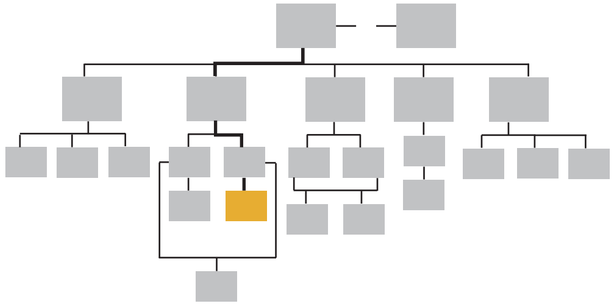

Basic Tips

The Basic Tips screen displays a real time feed of all the recent basic tips. The user can click on each individual tip button to be brought to a specific tip screen.

Actions

1. Tap to view featured tip
2. Tap to view specific tip
3. Scroll to view more basic tips

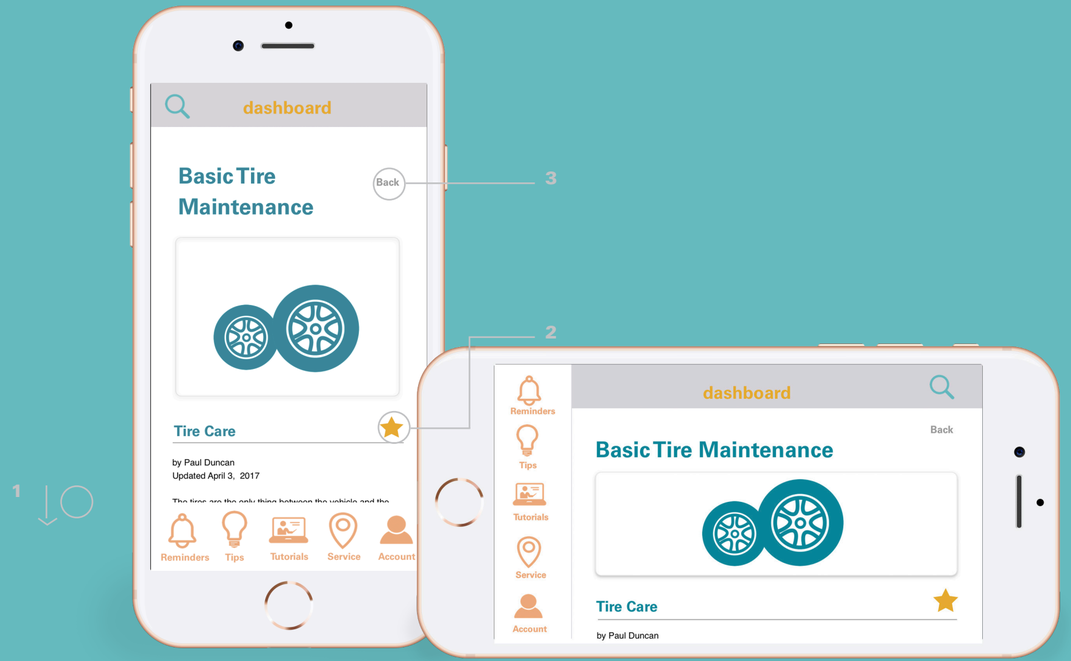

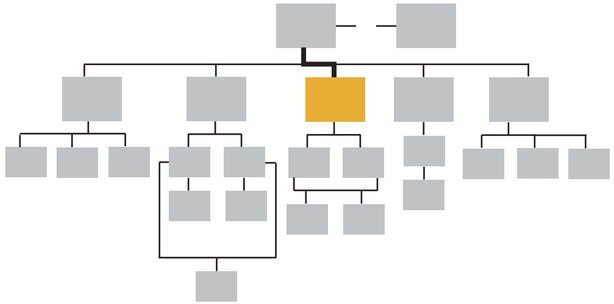

Basic Tip

The Basic Tip screen displays the important details of a basic tip. The tip shown discusses tire maintenance tips that the user can read. The user can also post related questions or comments on the tip screen. Furthermore, a user can favorite a tip by tapping the star. To go back to the Basic Tips screen, the user can tap the “Back “ button.

Actions

1. Tap to view featured tip
2. Tap to go to Eco-Friendly Tips
3. Tap to view specific tip
4. Scroll to read the more of article

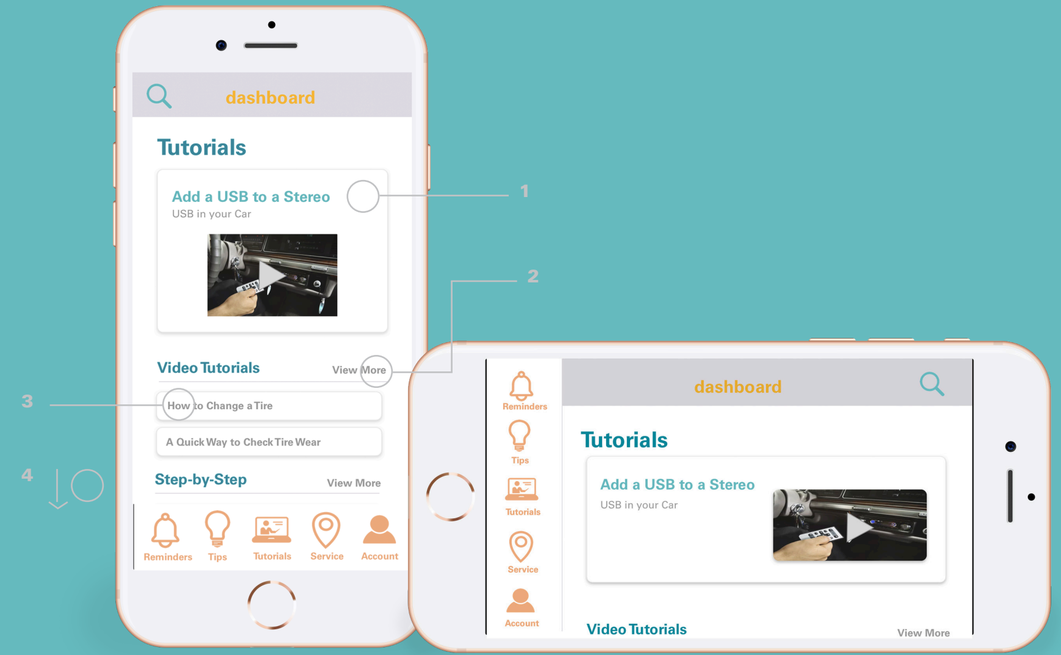

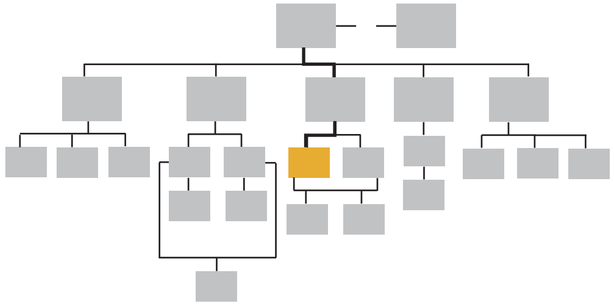

Tutorials

The Tutorials screen lists the most recent video and step-by-step tutorials included on the app. The user can click “View More” to go to the Video Tutorials screen or the Step-by-Step screen to view more tutorials. Users can press a tutorial button to go directly to an individual tutorial screen. Users will need to scroll down to view all of the recent tutorials.

Actions

1. Tap to view featured tutorial
2. Tap to go to Video Tutorials screen
3. Tap to view specific tutorial
4. Scroll to view more tutorials

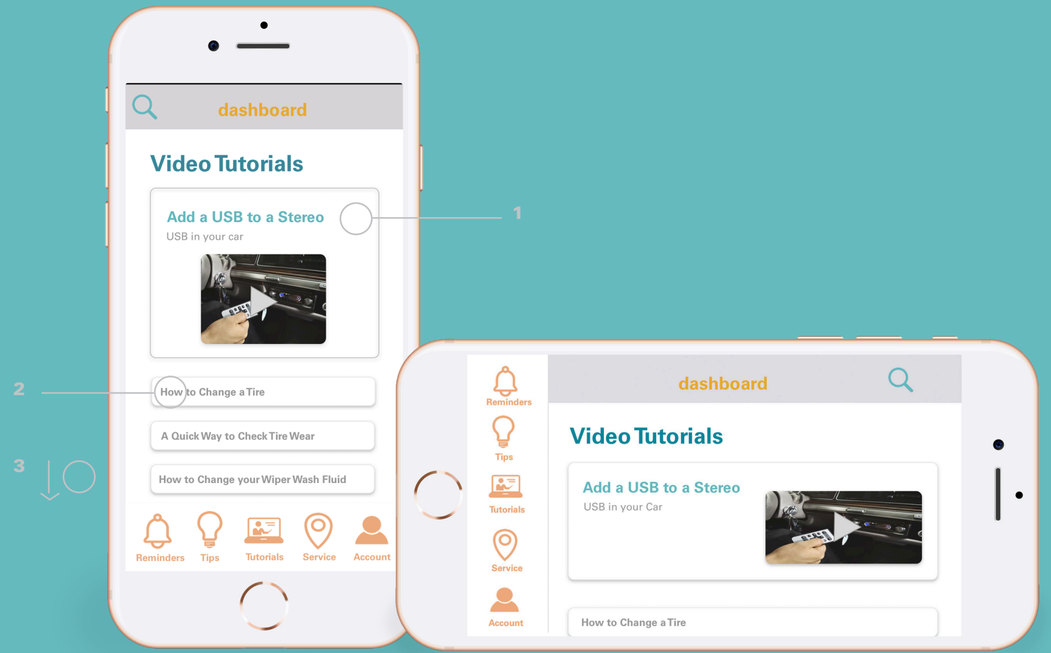

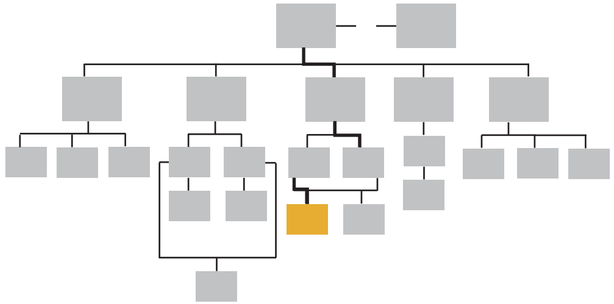

Video Tutorials

The Video Tutorials screen lists all of the video tutorials on the app. A user can click a tutorial button to go to an individual video tutorial page. A user will need to scroll down to view the entire list of video tutorials.

Actions

1. Tap to view featured tutorial
2. Tap to view individual tutorial
3. Scroll down to view entire list

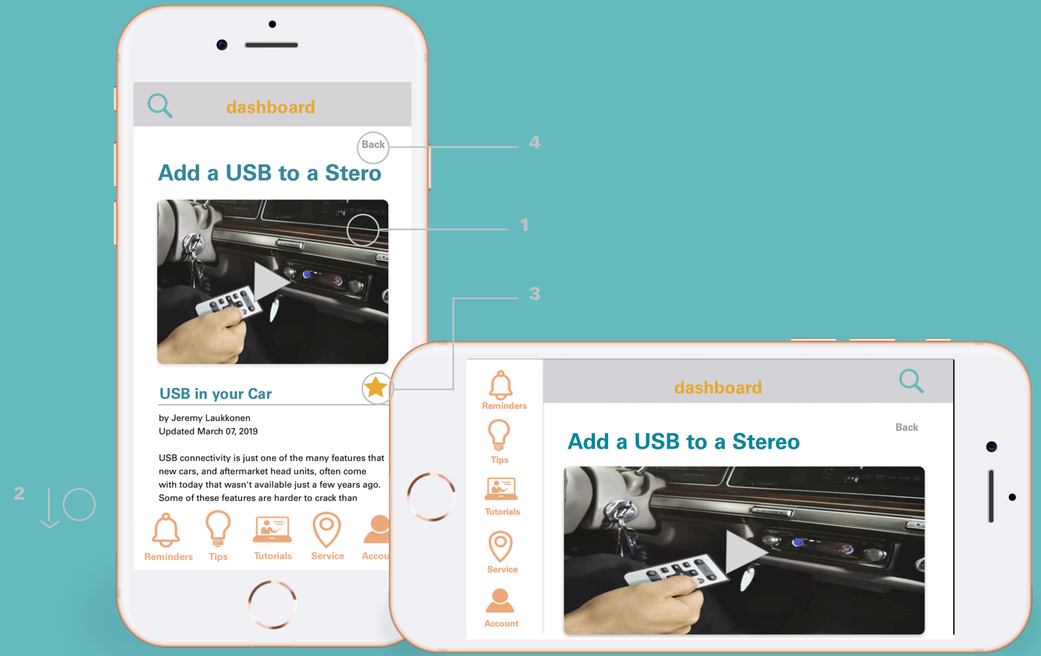

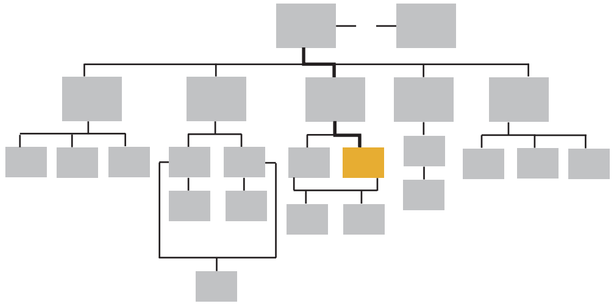

Video Tutorial

The Tutorials screen details all the information relevant to a specific tutorial. A user can click on a video to watch a tutorial while also following along with its accompanying article. They can scroll down to the bottom of the article to post a question or add a comment. Furthermore, they can favorite the article to look at later. When they are done with the tutorial, a user can click the “Back” button to go back to the Video Tutorial screen.

Actions

1. Tap to watch video
2. Scroll down to read entire article
3. Tap to view favorite tutorial
4. Tap to go back to Video Tutorials screen

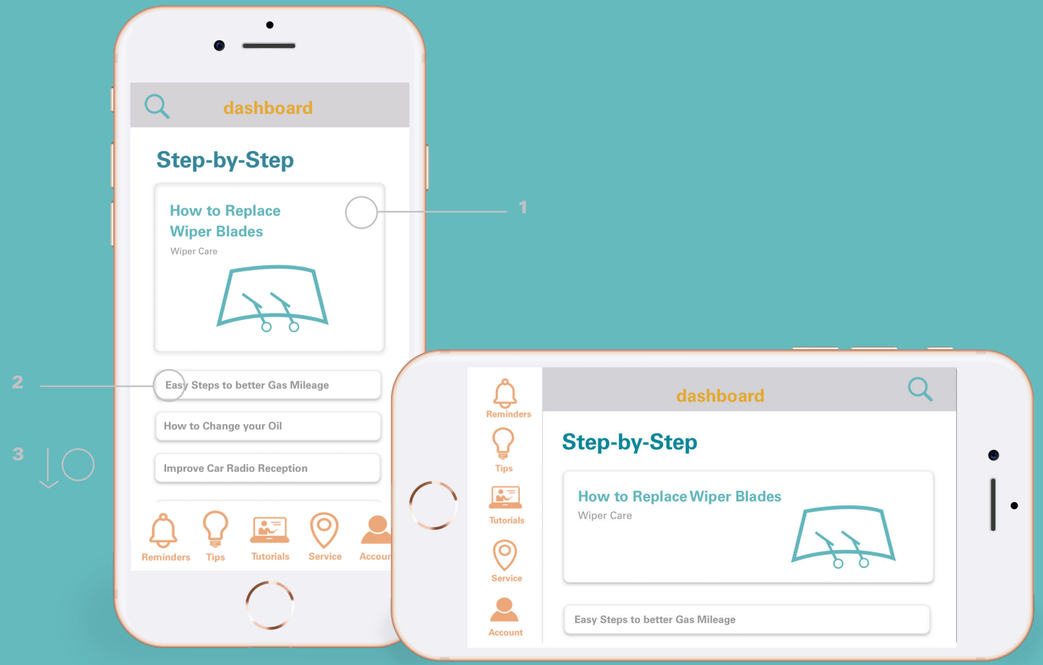

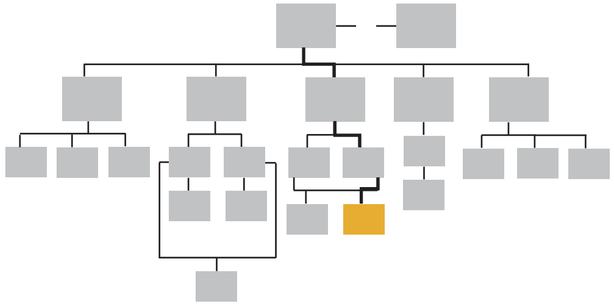

Step-by-Step

The Step-by-Step Tutorials screen lists all of the step-by-step tutorials on the app. A user can click an individual button to go to a tutorial screen that they can follow. In addition, a user can scroll to view the entire list of step-by-step tutorials on the app.

Actions

1. Tap to view featured tutorial
2. Tap to go to specific tutorial screen
3. Scroll to view list of tutorials

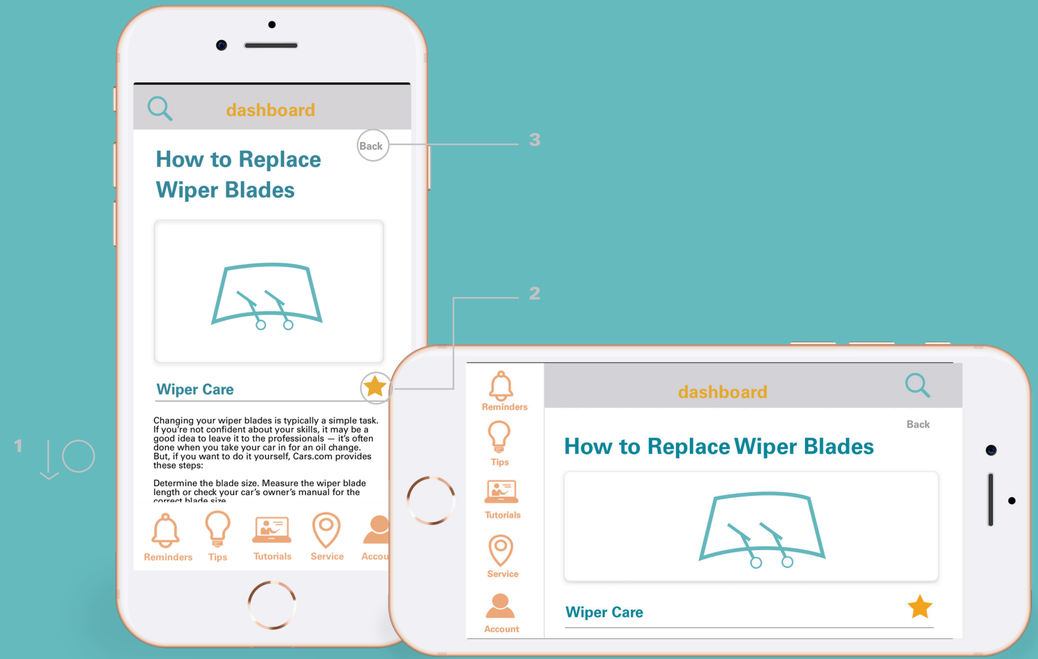

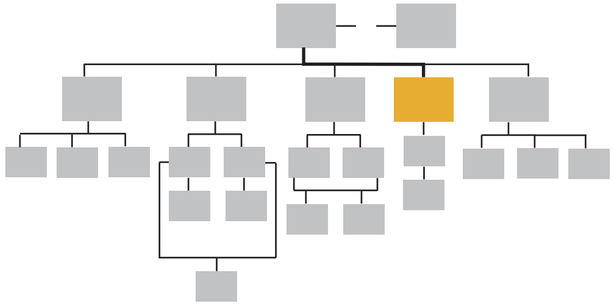

Tutorial

A Step-by-Step Tutorial screen details all the information relevant to that specific tutorial. A user can follow along to the different steps of completing a task by scrolling down the article. A user can also post comments/questions and read other users' comments at the end of the tutorial. Users can also favorite a tutorial to view later from the account page. When they are done, a user can tap the "Back" button to go to the Step-by-Step Tutorials screen.

Actions

1. Tap to view featured tip
2. Tap to go to Eco-Friendly Tips
3. Tap to view specific tip

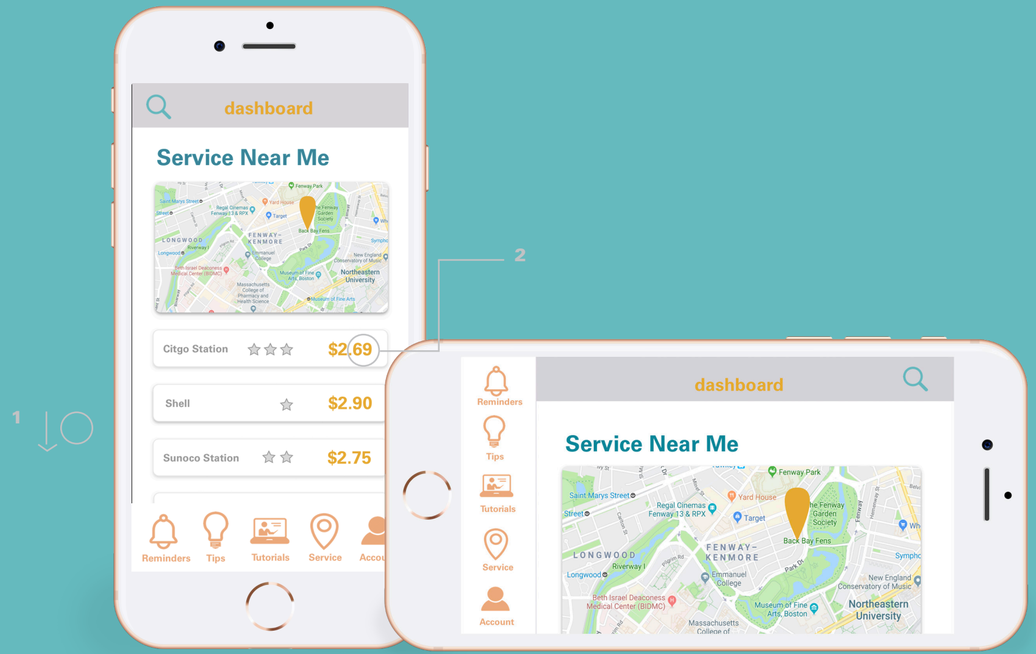

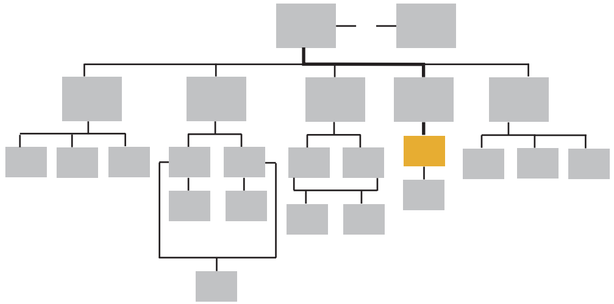

Service Near Me

The Service Near Me screen allows a user to find service stations near them. Users can view their location on a map and the distance of stations around them. Furthermore, users can see the reviews of a nearby station and their current price for unleaded gas. They can click on a station button to get more information and be brought to a specific service station screen.

Actions

1. Scroll to see list of nearby stations
2. Tap to view station information

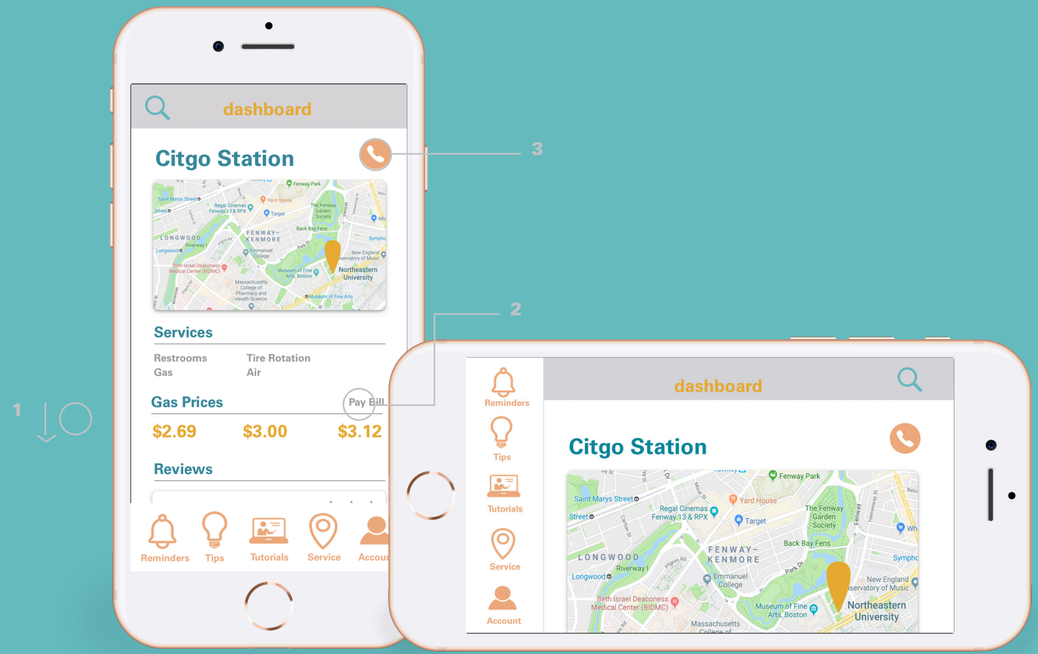

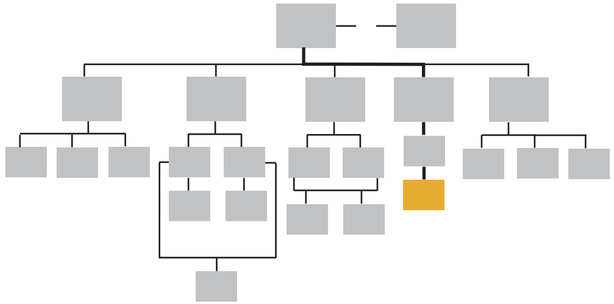

Service Station

The Service Station screen allows a user to view the services offered by the station, its location, reviews, and prices for gas. If a user is experiencing car trouble, they can call a particular station by pressing the phone button. In addition, a user can pay their bill from the app, by clicking the “Pay Bill” button where they will be brought to a pay form. A user can view reviews by scrolling down.

Actions

1. Scroll to view information and reviews
2. Tap to pay bill
3. Tap to call for assistance

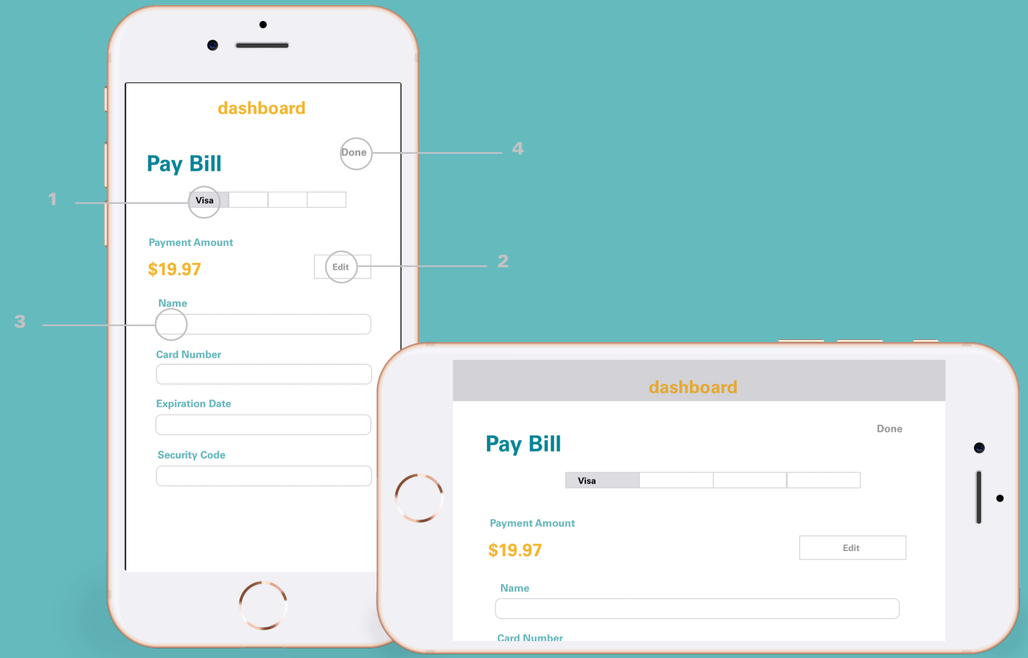

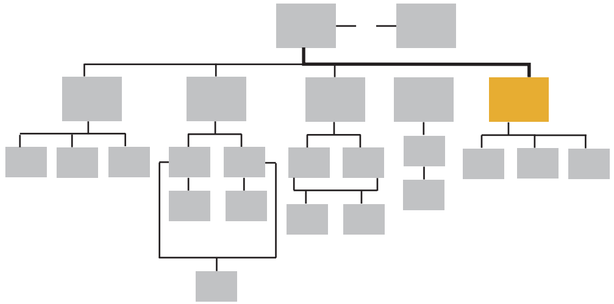

Pay Bill

The Pay Bill screen allows a user to pay their gasoline or maintenance bill from the app. Users can tap to choose the card type and enter their information. When they are done, they can tap the “Done” button where they will be brought back to the individual service station screen.

Actions

1. Tap to choose card type
2. Tap to edit
3. Tap to type
4. Tap to go back to service station screen

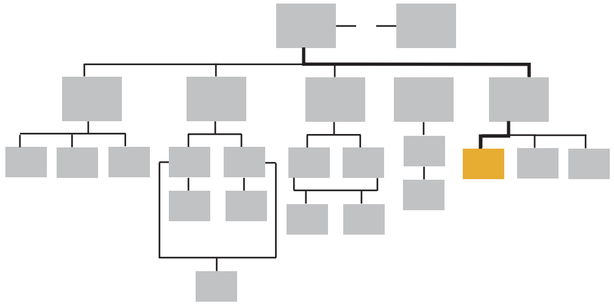

Account

The Account screen allows a user to view and edit their account information. Furthermore, users can access their settings on the app by tapping the gear. If a user presses “Edit” they will be brought to their Car Profile page where they can edit their information. Furthermore, a user can scroll through the app to view thier current Favorites.

Actions

1. Scroll through information
2. Edit Car Profile
3. Tap to go to Settings

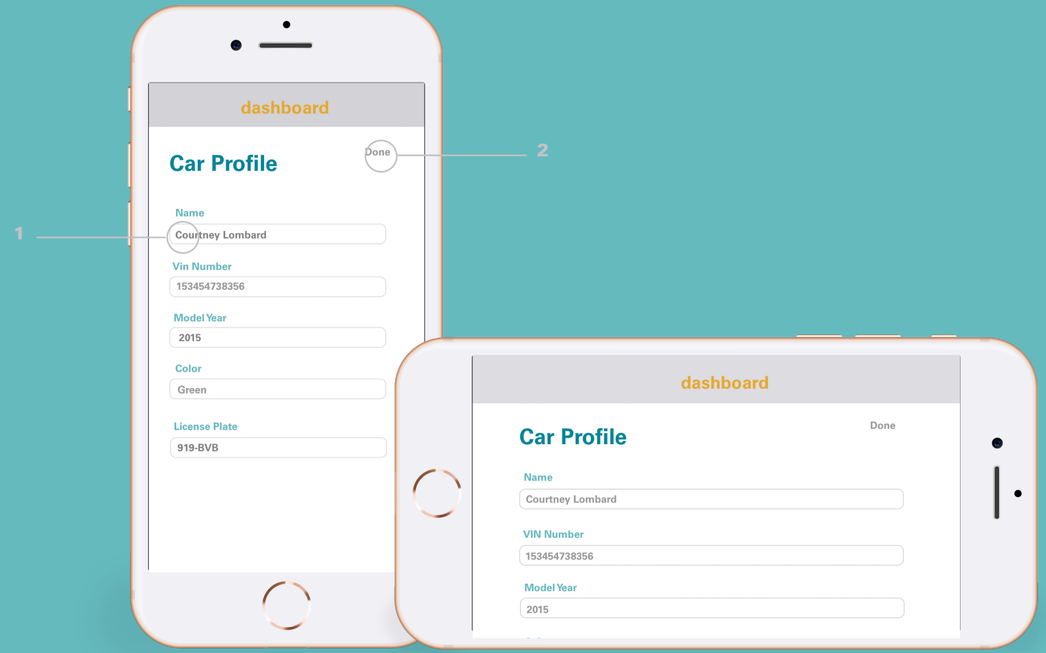

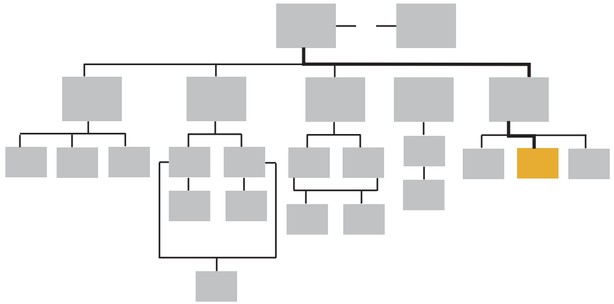

Edit Profile

The Edit Profile screen allows the user to edit the information in their Car Profile. They can change everything from the license plate number to the model year of the car by tapping to type. When they press the “Done” button they will be brought back to the Accoount screen.

Actions

1. Tap to type
2. Tap to go back to Account screen

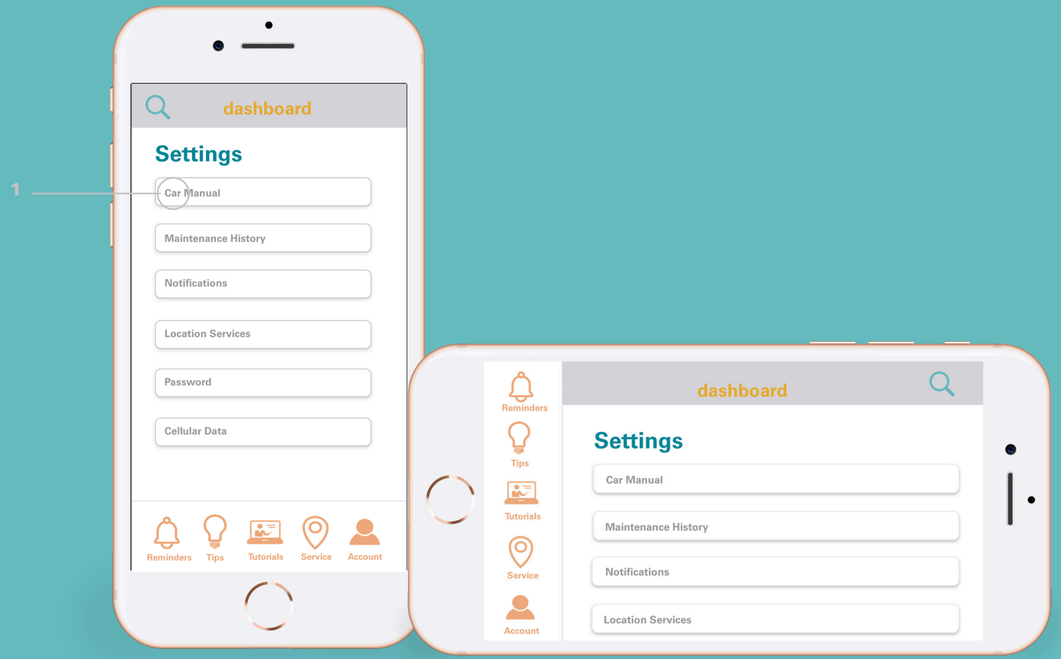

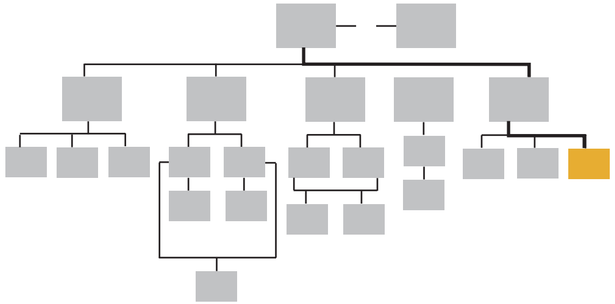

Settings

The Settings screen allows a user to access their settings on the app. Users can change how they receive notifications and turn on location services by tapping one of the options. When they press a settings button they will be brought to a screen with information on that specific setting.

Actions

1. Tap to view settings option

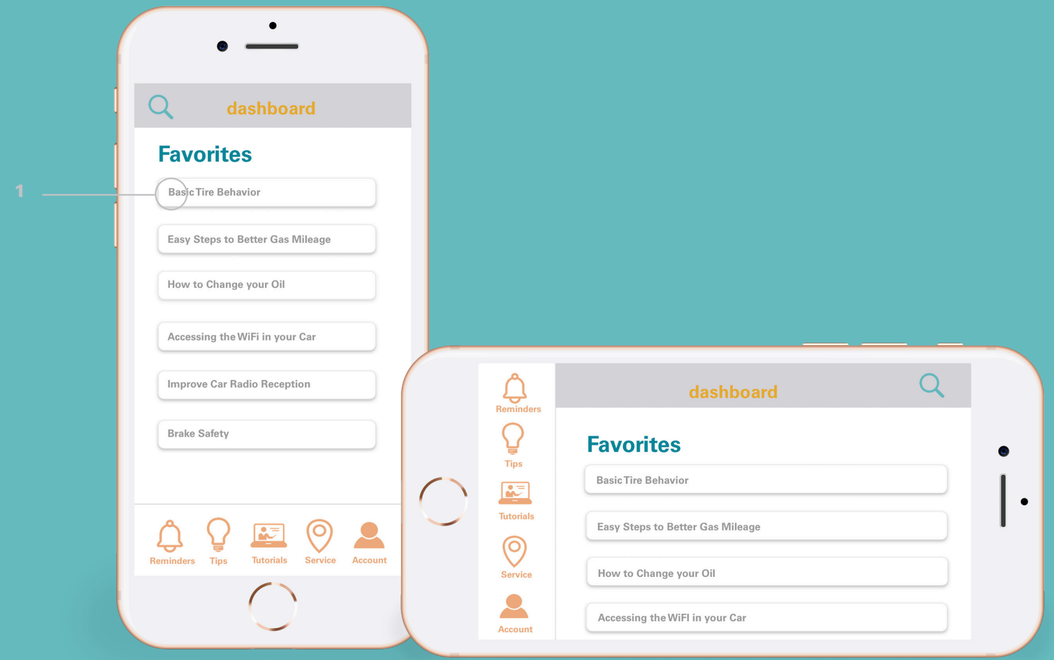

Favorites

The Favorites screen allows users to access their favorite tutorials and tips. Users can click on an individual favorite that would bring them to a tip or tutorial screen.

Actions

1. Tap to view favorited tutorial or tip

Colophon

This app booklet was created by Courtney Lombard for COMM 340 Advanced Design. Adobe InDesign CSS was used to create the layout of each spread. Adobe Photoshop was used to create the iPhone mockups. Typefaces used included Univers 45 Light, 55 Roman, 65 Bold, and 75 Black. It was printed on bright white 8.5" x 11" paper, spiral bound with a clear cover and black backing by the Simmons Copy and Mail Center.
